INSTRUCTIONS FOR USE

*Please ensure you have read and followed the installation instructions prior to operation.

PRODUCT DESCRIPTION

PRO-KLEEN™ is a portable, pressurized dental unit waterline cleaning system designed to dispense Mint-A-Kleen®, dental unit waterline cleaner, to dental units without bottle systems that are on city water. Now offices on city water without bottle systems do not have to invest in bottle systems in order to treat and maintain clean dental unit waterlines.

Administering Mint-A-Kleen® using PRO-KLEEN™ is a safe, affordable, convenient and effective cleaning system for offices on city water who are committed to dental unit waterline infection control.

FOR GENERAL DENTAL PROCEDURES

IMPORTANT

Check Mint-A-Kleen® fluid level in PRO-KLEEN™ and replace/refill bottle if necessary. Ensure dental unit’s master toggle switch is in the ‘ON’ position. Prior to dental unit waterline treatment, remove handpieces, scaler insert and syringe tips.

INITIAL CLEANING:
Week 1: Use every night
Week 2: Use bi-weekly

ROUTINE CLEANING:
Use once per week. For optimal results, use at the end of the last business day of the week.

HOW TO USE PRO-KLEEN™ TO CLEAN DENTAL UNIT WATERLINES WITH MINT-A-KLEEN®

1. Attach a full Mint-A-Kleen® bottle to PRO-KLEEN’s manifold.
2. Turn dental unit’s utility box’s toggle switch in the OFF position.
3. Insert PRO-KLEEN’s YELLOW and BLUE male quick-disconnects into like colored female quick-disconnects on dental unit’s utility box. YELLOW is ‘air supply’ and BLUE is ‘fluid connection’.
4. Turn the PRO-KLEEN™ selector toggle switch to the AIR PURGE position and run handpieces, syringe, and scaler and any other oral cavity water-consuming device until air is expelled.
5. Turn the PRO-KLEEN™ selector toggle switch to the MINT-A-KLEEN® position and run handpieces, syringe, and scaler any other oral cavity water-consuming device until Mint-A-Kleen® is visible.
6. Remove PRO-KLEEN’s YELLOW and BLUE quick-disconnects from the dental unit’s utility box.
7. Turn dental unit’s utility box’s toggle switch in the ON position.
8. Allow Mint-A-Kleen® to treat dental unit waterlines for at least 12 hours before flushing with water.

**FLUSH DENTAL WATERLINES AFTER A MINIMUM OF 12 HOUR MINT-A-KLEEN® TREATMENT**

1. FLUSH handpieces, syringe, scaler and any other water-consuming device with WATER for 30 Seconds.
2. Begin dental procedures.

**IMPORTANT NOTICE REGARDING WATER HEATERS**

If a tank type water heater is in use, the following important information must be considered. Most water heaters of this style cannot be run dry when turned on. Water Heaters must be shut OFF prior to being drained. As both the PRO-KLEEN™ and bottle systems purge air through the waterlines prior to injecting Mint-A-Kleen liquid, it is critical that the water heater be turned OFF during this process.

**FAILURE TO TURN TANK TYPE WATER HEATERS OFF DURING THE PROCESS OF ADMINISTERING MINT-A-KLEEN® COULD CAUSE WATER TANK ELEMENT FAILURE.**
